BOARDROOM FURNITURE

eborcraft

Eborcraft's latest Oracle collection takes boardroom furniture to a new level. A greater choice of beautiful wood veneers, including such stunning new options as Wenge and Smoked Swiss Pear ... unusual new crossbanding designs featuring dramatic veneers such as Zebrano and Madrona ... innovative new features such as illuminated frosted glass panels inset into the table ... and most importantly in today's high-tech office environment, the option to incorporate visual aids and a wire management system into many of the new Oracle tables.

Barrel-shaped table in Oak, with English Pippy Oak inlay, on Oak arrowhead bases

One of the special attractions of the Oracle collection is that a combination of veneers and patterns can be used to create a boardroom table which is as unique as it is beautiful. With the table featured here, walnut and maple have been crossbanded to achieve a "traditional" appearance, but then given a strikingly contemporary appeal by inlaying burr walnut in a contrasting geometric design.

This conical base enables a wire management system to be invisibly incorporated, operated by a retractable power management module which is neatly fitted into the table top.

Top picture: Oval-shaped table in American Black Walnut crossbanded with Maple and with Burr Walnut inlay, on pedestal bases with polished chrome finish

Bottom picture: Alternative conical bases

A special feature of tables in the Oracle collection is that the edges can be finished with either a matching or contrasting veneer. The Smoked Swiss Pear table featured below has a Maple edging to complement the inlay, giving it an unusual and eye-catching appearance.

*Top picture: Semi-circular ended table in Smoked Swiss Pear (bespoke) with Bird's Eye Maple inlay, on domed pedestal bases with polished chrome finish
Bottom picture: Alternative chromed steel base*

A dramatic optional addition to the rectangular table pictured below is the frosted glass illuminated panel with stainless steel rim, transforming a classic-shaped table to a modernistic design.

Rectangular table in American Black Walnut on slab-end bases

Boardroom furniture is often as much about prestige as functionality. This stunning boardroom table, designed to seat up to 26 people, creates an immediate impact and is just one of many bespoke designs which Eborcraft has manufactured.

Barrel-shaped table in Maple, with Burr Walnut inlay on aerofoil bases

The Smoked Swiss Pear table pictured below is discreetly fitted with a wire management system concealed in the cylindrical base. It is operated via a slimline power management module, which neatly retracts into the table top and is covered by a flush-fitting cap.

The impression conveyed by a boardroom table can be dramatically altered according to the style of base which is fitted. In previous pages, the Smoked Swiss Pear table pictured above was featured with a choice of chrome bases for an ultra-contemporary appearance, whilst here a cylindrical wood base combines a modern style with a traditional material to give it a timeless appearance suitable for any corporate environment.

Semi-circular ended table in Smoked Swiss Pear (bespoke) with Bird's Eye Maple inlay, on cylindrical bases

The Visual table design can be fitted with a monitor lift and power management module, both of which fit flush to the table when not in use. The tapered shape of the table enables all participants to enjoy an unrestricted view of the visual aid.

Visual table design in Maple with Madrona inlay (bespoke), on square bases

The striking effect of this table is further enhanced by a special vertical edging veneer, giving a wrap-around appearance

A selection of tables within the Oracle collection can be fitted with wire management systems, which are neatly concealed within the base by a discreet removable panel.

Top picture: Dual curve table in Maple and Zebrano crossbanding (bespoke) on aerofoil bases
Bottom picture: Alternative extended cylindrical bases

A classic rectangular table can be given a bespoke appearance by inserting a contrasting veneer to form a unique pattern. Any inlay design can be specified, including logos.

A choice of control panel for the wire management system is available. Both options are inset into the table top to give an unobtrusive appearance.

The impact of a table can be enhanced simply by increasing the depth of the table top, as this top with 50mm thickness demonstrates.
