with optional compact staple finisher

Small businesses and workgroups can now think big – while depending on highly compact multifunctional devices. Canon's compact imageRUNNER Range delivers outstanding value and robust security – with print speeds as high as 50ppm.

Compact yet big on performance.

imageRUNNER 2520 with optional paper cassettes

Flexible choice

Where space is a premium and productivity is a requirement, Canon's compact imageRUNNER Range provides the flexibility you need. A selection of A4 printing devices are complemented by a suite of versatile A3 multifunctional solutions designed to meet all your document requirements.

Easy to use

Each device in Canon's Compact imageRUNNER Range is designed to make operation simple. The imageRUNNER 1100 series incorporates an intuitive 5-line backlit display. While for users requiring greater flexibility, the iR1700 series and iR2500 series feature 5.7-inch touch screen displays.
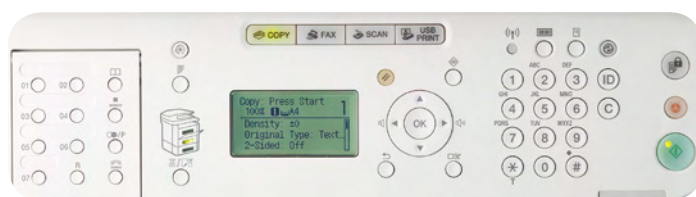

Productive and versatile

However you wish to communicate, these multifunctional devices help you do it without fuss. Print, copy, fax, scan and send at speeds as high as 50ppm. Fast double-sided printing facilities add a professional touch to all your documents. And for added convenience, users can scan to and print from USB[1] on selected models, so there's no need for a PC or laptop.

Enhance your productivity with Colour i-Send

Increase productivity and transform business processes with Colour i-Send, allowing users to quickly and efficiently scan in colour directly to a variety of destinations, including network folders on selected models, FTP sites and email addresses. Advanced LDAP search makes distribution to email quicker and easier through rapid address resolution, improving office workflow.

Quick deployment

A selection of network-ready models with PCL and PS support makes introducing these devices in to your business effortless. Canon's iW Management Console enables entire fleets to be effortlessly managed from a single point of contact.

Each of these multifunctional solutions is designed to help you save time and money. A compact footprint consumes minimal office space. And thanks to compatibility with Canon's uniFLOW software, costs can be monitored and controlled, and documents kept secure.

Watertight document security

Ensuring confidential information stays confidential is a key consideration in today's business climate. Canon's compact imageRUNNER Range incorporates a number of facilities to provide peace of mind.

Department IDs – Access to devices can be controlled using ID numbers so only authorised users can operate them.

Secure print – To prevent confidential information piling up in output trays waiting to be collected, Secure Print on selected models ensures they're held until users are ready to retrieve them. Once identified at the device using an ID number the user's document is printed and then collected.

uniFLOW MyPrintAnywhere[1] – Documents can be picked up at the most convenient device on the network – irrespective of where they were initially sent.

Optional uniFLOW card authentication

Enabling high speed document printing to be carried out directly at your desk.

optional paper cassette

Keep security high and costs low.

Space saving

Office space is valuable. That's why it makes sense to carry out document communication with one device that can do the work of many. Canon's compact Office Range offers this capability from a device with a surprisingly small footprint - enabling high speed document printing to be carried out directly at your desk.

Control costs with uniFLOW

uniFLOW compatibility makes managing and controlling costs easy – as well as offering excellent security facilities. The cost of every single print, copy, fax and scan activity can be monitored across the network – by device, user or department.

In large organisations, with numerous devices this is particularly powerful since it enables IT managers to quickly see how much is being spent and how. Enabling proactive controls to be put in place to ensure printing is as efficient and effective as possible.

Devices to depend on

Canon's reputation for quality and reliability ensures office productivity remains high at all times. Canon's e-Maintenance service can further maximise uptime through its remote diagnostics capability which can help ensure problems are rectified first time should a technician visit. Plus, consumables monitoring service helps ensure your device never need run out of toner while automated meter readings can cut administrative burdens.

Energy efficient

These ENERGY STAR® certified devices consume as little as 1 watt[2] in sleep mode[2] and offer economical, class-leading TEC (Total Energy Consumption) credentials.

1: Requires uniFLOW software solution.
2: This statement only applies to the 1700 series only.
Note: Not all features are available on all products. Please refer to the step-up chart on the last two pages or visit our website at www.canon-europe.com

Compact solutions for every business.
